Winbert Costacio

FULL-STACK DEVELOPER · MACHINE LEARNING DEVELOPER

Naic, Cavite, Philippines · 0926 054 2543 · costaciowinbert.stemargon@gmail.com · github.com/costaciowinbertstemargon-spec

CORE SKILLS

Languages
JavaScript, TypeScript, Python, PHP, SQL, HTML5, CSS3

Web
React.js, Node.js, Express.js, FastAPI, Tailwind CSS, WordPress, REST APIs, responsive design

Machine Learning
Scikit-learn, Random Forest, K-Means clustering, predictive modeling, model evaluation, feature engineering

Data
MySQL, PostgreSQL, Firebase, database design, data cleaning and analysis

Tools
Git and GitHub, Figma, Canva, object-oriented programming

STRENGTHS

- Fast, self-directed learner
- Strong troubleshooting and problem solving
- Works well solo and in teams
- Careful with data and documentation
- Audit-trained attention to accuracy

EDUCATION

B.S. in Computer Science
Cavite State University – Naic Campus
Naic, Cavite, Philippines

Graduation: September 2, 2026
GPA 1.43 · Cum Laude

1.43 GPA
Cum Laude, B.S. Computer Science

Web + ML
React, Node, FastAPI, Scikit-learn

3 systems
MedSort · Voting · Point of Sale

PROFILE

Full-stack developer who combines web engineering with applied machine learning. Built MedSort, a thesis system that flags medical supplies at risk of expiring, from the React dashboard to the FastAPI and Scikit-learn models behind it. Cum Laude Computer Science graduate with freelance, back-end, and IT support experience, and a record of picking up new tools quickly.

FEATURED PROJECT

MedSort: Intelligent Medical Inventory Management System

Lead Full-Stack and Machine Learning Developer · Thesis, 2025–2026

React.js, Tailwind CSS, Node.js, Express.js, Python, FastAPI, Scikit-learn, MySQL, Firebase

– Designed and built the full system: React dashboards, Express and FastAPI services, MySQL and Firebase storage, and Scikit-learn models.
– Predicted which medical supplies are at risk of expiring using Random Forest classification and K-Means clustering, after preparing the data, engineering features, and evaluating the models.
– Delivered inventory tracking, item-movement history, notifications, analytics, and reports, with dashboards that show stock status and expiration risk at a glance.
– Developed the REST APIs that connect the web client, database, and ML components.

EXPERIENCE

WordPress Developer

Freelance · 2 months

– Delivered WordPress sites from client requirements and existing designs, covering structure, content, styling, responsiveness, and troubleshooting.

Information Technology Intern (OJT)

Research and Development Extension Services, Cavite State University – Naic · 2024–2025

– Digitized and organized thesis and research documents for electronic access.
– Documented RDES meetings and activities, and co-produced an institutional event video.
– Resolved printer and other technical issues to keep the office productive.

Auditor

ICT Student Organization (ICTSO) · 2023–2024

– Audited financial records, checked compliance with organizational policies, and wrote reports with corrective actions.
– Analyzed operational processes to find inefficiencies and recommended improvements.
– Organized technology events and student activities.

ADDITIONAL PROJECTS

Point of Sale System, Big Brew Ternate Branch · Back-End Developer, 2024–2025
Contributed back-end development and system functionality to a point-of-sale application.

ICTSO Campus Voting System · Full-Stack Developer, 2023–2024
Built a web-based voting system with database integration (HTML, CSS, JavaScript, PHP, MySQL).
