

WINBERT CUEVAS COSTACIO

COMPUTER SCIENCE STUDENT | FULL-STACK WEB DEVELOPER | MACHINE LEARNING DEVELOPER

Naic, Cavite, Philippines | 0926 054 2543 | costaciowinbert.stemargon@gmail.com |
github.com/costaciowinbertstemargon-spec

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience developing **full-stack web applications, database-driven systems, REST APIs, and machine learning solutions** through academic and project-based experience. Proficient in **JavaScript, Python, PHP, SQL, React.js, Node.js, Express.js, MySQL, and Scikit-learn**. Experienced in developing and troubleshooting software systems, integrating frontend and backend components, managing databases, and implementing machine learning models. Strong problem-solving, analytical, and technical skills with a willingness to learn and adapt to new technologies and professional development environments.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, TypeScript, PHP, SQL, HTML5, CSS3

Web Development: React.js, Node.js, Express.js, Tailwind CSS, Full-Stack Development, Responsive Web Design, REST APIs

Database and Data: MySQL, Database Design, Data Analysis, Data Cleaning, Feature Engineering, Data Modeling

Machine Learning: Scikit-learn, K-Means Clustering, Random Forest, Predictive Modeling, Model Evaluation

Development Tools: Git/GitHub, Figma, Canva, Version Control, Object-Oriented Programming

Other Skills: Technical Troubleshooting, Documentation, Data Organization, Financial Record Auditing, Report Preparation

INTERNSHIP EXPERIENCE

Auditor | Information and Communication Technology Student Organization (ICTSO) | 2023–2024

- Maintained financial records to support accuracy, accountability, and organized financial documentation.
- Conducted audits of financial records and reviewed compliance with organizational policies.
- Analyzed operational processes to identify inefficiencies and recommend improvements.
- Prepared audit reports summarizing findings and recommended corrective actions.
- Organized technology-related events and student activities to support student engagement and community involvement.

Information Technology Intern (OJT) | Research and Development Extension Services (RDES), Cavite State University – Naic Campus | 2024–2025

- Troubleshoot printer issues and addressed basic technical concerns to support office productivity.
- Digitized and organized undergraduate thesis and research documents through scanning and electronic file management.
- Prepared and documented RDES meetings and institutional activities, maintaining accurate records and supporting smooth execution.
- Produced and edited an institutional event video with another IT intern to document key activities during an RDES meeting.

THESIS RESEARCH / MAJOR PROJECT

Lead Full-Stack Developer and Machine Learning Developer | MedSort – Intelligent Medical Inventory Management System Using Machine Learning | 2025–2026

Technologies: React.js, Tailwind CSS, Node.js, Express.js, Python, FastAPI, Scikit-learn, MySQL, Firebase

- Developed a web-based medical inventory management system for monitoring inventory, item movement, expiration risks, notifications, analytics, and reporting.
- Implemented K-Means clustering and Random Forest classification to analyze and predict medical supply expiration risk.
- Developed backend services and REST API functionality to connect the web application, database, and machine learning components.
- Performed data preparation, feature engineering, model evaluation, and inventory-risk analysis to support system predictions.
- Designed dashboards and inventory tracking features to improve visibility of stock status and expiration-related risks.

EDUCATION

Bachelor of Science in Computer Science | Cavite State University – Naic Campus | Naic, Cavite, Philippines

- Expected Graduation: September 2, 2026
- Expected Latin Honor: Cum Laude
- GPA: 1.43

ADDITIONAL PROJECTS

Full-Stack Developer | ICTSO Campus Voting System | 2023–2024

Technologies: HTML, CSS, JavaScript, PHP, MySQL. Developed a campus voting system with web-based functionality and database integration.

Back-End Developer | Point of Sale (POS) System – Big Brew Ternate Branch | 2024–2025

Contributed to back-end development and system functionality for a point-of-sale application.
